Meeting Number:

**999 106 825**

Audio Connection

**1-951-808-8299** (Local)

**1-888-300-5552** (Toll Free)

Locations:

DigAlert - 1379 Pico St #101, Corona, CA

USA North 811 – 4005 Port Chicago Highway #100, Concord, CA

Continue discussion on “What constitutes reasonable care, as required by paragraph (1) of subdivision (a) of Section 4216.4, in grading activities on road shoulders and dirt roads which may include standards for potholing.”

Determine if standards for reasonable care in the grading activities on road shoulders and dirt roads differ from general roadbuilding activities. If so, how?

Identify what circumstances might make a subsurface installation whose exact location has been determined in one location be at a different depth at a nearby location.
